

AMNIOTIC MEMBRANE ALLOGRAFT

What is Amniotic Membrane Therapy?

A biological bandage covering containing innate properties that

- Helps promote epithelialization
- Reduces pain
- Minimizes inflammation of the ocular surface

Why implement AM into your practice?

Clinical Consideration

The use of regenerative medicine and specifically amniotic membrane is cutting edge and the latest in innovative therapies. You harness and expedite the body's own healing capabilities improving patient's quality of life and overall patient care.

Indications for use in-clinic include:

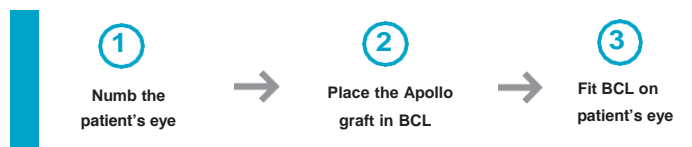

- Corneal Ulcers
- Severe Dry Eye
- Corneal Abrasions & Scratches
- Keratopathy Defects
- Post-Infection Keratitis
- Chemical/Thermal Burns of the Ocular Surface

The Apollo Difference:

Clinical Convenience

- Multiple sizes for optimal fit (8mm disc, 10mm disc, 12mm disc and 14mm disc)
- Dual sided for easier placement
- Stored at room temperature with shelf life of up to 5 years

Ease-of-Use

Why Atlas Ocular?

- Focus on education
- Provide support from patient selection through post procedure visit including billing
- Comfortable for the patient

Billable in-clinic procedure

- Medicare reimbursable using CPT 65778
- 2026 CMS National Average \$1,274.21*
- Reimbursement support provided on request.
